Pranidhi Methmini

Aspiring Software Engineer
Matara, Sri Lanka | pranidimethmini@gmail.com | +94 76 661 8312 | GitHub | LinkedIn

SUMMARY

Third-year Information Technology & Management undergraduate at the University of Moratuwa with hands-on full-stack development experience using React, TypeScript, NestJS, and PostgreSQL. Experienced in REST API development, relational databases, and Agile collaboration through an industry-mentored valuation management platform involving OCR and AI-assisted automation. Seeking a Software Engineering Internship to apply full-stack development skills in a professional engineering environment.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, C, PHP, SQL
Databases: PostgreSQL, MySQL, MongoDB
Frameworks & Tools: React, Next.js, Tailwind CSS, Node.js, NestJS, Prisma, Postman, Git, GitHub, Figma
Concepts & Practices: Object-Oriented Programming (OOP), REST API Development, Agile/Scrum

PROJECTS

Valuation Document Management & CRM System
Industry-Mentored Full-Stack Web Application
React, TypeScript, NestJS, PostgreSQL *Jun 2025 – Jul 2026*
GitHub Repository

Role-based valuation management platform that automates property valuation workflows through OCR-based document extraction, AI-assisted report drafting, map integration, and a multi-level approval workflow.

- Developed Loan Applicant and Bank modules, including valuation requests, document uploads, payment evidence submission, project information management, and controlled access to completed reports.
- Implemented shared features including in-app messaging, notifications, and email communication using Nodemailer and SMTP.
- Implemented full-stack features using React,TypeScript, NestJS REST APIs, and PostgreSQL.
- Contributed to requirements analysis, UML modeling, database design, testing, and issue resolution as part of a 5-member Agile team using GitHub Projects.

Resource Reservation Management System
Full-Stack Web Application
Next.js, TypeScript, PostgreSQL, Prisma, NextAuth, Tailwind CSS *Oct 2026*
GitHub Repository

A centralized resource reservation platform that enables users to check resource availability, make and manage bookings, and prevents overlapping reservations through database-level constraints.

- Developed a full-stack resource reservation platform with role-based authentication, resource management, booking, and cancellation workflows.
- Implemented double-booking prevention using PostgreSQL exclusion constraints and transaction-level locking to maintain reservation consistency.
- Designed relational database models with Prisma and implemented server-side validation and access control for USER and ADMIN roles.
- Verified application reliability through 81 automated tests, TypeScript checks, linting, and production build validation.

Automated Object Sorting System with Robotic Arm & Conveyor
Microcontroller-Based Hardware Project
Arduino Uno, Arduino Mega, RFID, Ultrasonic Sensors, Servo & Stepper Motors *May 2024 – May 2025*

- Developed an automated sorting system integrating a robotic arm and conveyor using RFID-based object identification.
- Integrated ultrasonic sensors for object detection and bin-capacity monitoring with LED and buzzer alerts.
- Programmed servo and stepper motors and implemented an LCD interface for system control and real-time feedback.
- Collaborated in a team-based embedded systems project involving hardware-software integration and sensor-based automation.

EDUCATION

University of Moratuwa *Mar 2024 – Present*

BSc (Hons) in Information Technology & Management | Expected Graduation: Jul 2028
- GPA: 3.33/4.00

St. Thomas' Girls' High School, Matara
- G.C.E. Advanced Level (2022/2023) Biological Science - 2B, 1C
- G.C.E. Ordinary Level (2017) - 9 A passes
